

SCOPE CIMSA SECOND BATCH 2019-2020 EXCHANGE OUTGOINGS

EMPOWERING MEDICAL STUDENTS
IMPROVING NATION'S HEALTH

Preface

Standing Committee on Professional Exchange (SCOPE) is the oldest standing committee of IFMSA. Since established in 1951, in the same year IFMSA did, SCOPE has worked to facilitate exchange for medical students around the world. Our own SCOPE CIMSA was established in 2001, and under the leadership of the National Exchange Officers, we are aiming to develop SCOPE to be the largest exchange program for medical students in Indonesia. Today, we facilitate around 200 medical students each year to go for their clinical exchange.

In line with the definition of an exchange, SCOPE exchange also works two ways – we host the incomings and we also send our outgoings. Our ever-growing LCs host foreign students and help them during their exchange: bring them to see the wonders of Indonesia, help them through the administration procedures of their clerkship in the hospital, and surely, be their friend and guide during their stay.

For the outgoings, we select Indonesian medical students who have both the strong motivation and interest, also the needed ability, to taste the clinical experience abroad in various countries. Surely, we also help them go through the administration and other processes needed to go for exchange according to their countries and the regulations of IFMSA and the host country. This is to ensure that their exchange will go smoothly, and they will get the most out of their exchange experience.

Surely, applicants, you all have gone through the qualified selection process, and hereby I will announce those who will go on with the process as outgoings. Hopefully, everyone who is selected will use this opportunity wisely. Do remember, as outgoing exchange students, you all will bear the weight of our beloved country, Indonesia, and your own university's name, so behave accordingly and be a respectable representative that shows the good quality and values our nation have. Please do respect the regulations and be punctual during the preparation of your exchange, as tardiness might harm the continuity of your exchange. Please use this opportunity as well as possible, learn new things, socialize, and I hope you could use this exchange as a chance to develop yourself as a better human resource of health, for the improvement of our nation's healthcare system. Once again, congratulations!
